Dr. John Anastasatos, Plastic Surgeon

For Dr. John Anastasatos, plastic surgery is more than science, more than technique, and much more even than the well-schooled practice of a medical specialty.

Rather the work Dr. Anastasatos does each day is a chance to see hope come alive, to see dreams become reality. He brings his well-honed skills and exhaustive training to bear on patients striving to be the best they can possibly be. "My challenge is to achieve perfection every time," he says.

Born in New York City in 1970, Dr. Anastasatos studied at Brown University, both undergraduate and medical school, graduating with honors. He completed a residency in general surgery at New York's Columbia University and then trained in plastic and reconstructive surgery at UAB. His mentor was Professor Luis. O Vasconez, MD, chairman of the division at UAB, and a man who enjoys worldwide recognition as the inventor of many plastic surgery techniques.

Today Dr. Anastasatos is an Assistant Professor of Plastic and Reconstructive Surgery at UAB, and a plastic surgeon certified by the American Board of Plastic Surgery. His work has been featured on ABC 33/40 and *The Birmingham News*.

His career has been guided by a philosophy of helping people, eliminating pain, and guiding patients to a beautiful appearance and an inner-happiness.

Dr. Anastasatos has developed a new technique to perform breast lifts with minimal scarring. Along with his dedication to breast surgery, including augmentations, Dr. Anastasatos specializes in rhinoplasty, facelift, body contouring and liposculpture.
